Interest and charges

Interest payable to you	Interest is calculated daily on balances in excess of the minimum balance. The interest rate is varied, which means it can go down as well as up. You can have your interest credited to your account monthly or quarterly. You can find out what our interest rates are by looking on the “Personal banking; Savings Acct” or “Business Banking; Business Deposits” page of our website www.fidbank.co.uk or by calling us. On some FidBank UK Limited Call Accounts, you can earn a higher rate of interest; the higher the balance on your account. We will always give you 2 months personal notice if we reduce any of the interest rates on your account.
Tax	From 6 April 2016, HM Revenue and Customs (HMRC) made changes to the way credit interest is taxed. This change meant that credit interest is paid gross, and tax isn't deducted when paid into your account. The interest paid will contribute towards your Personal Savings Allowance, if applicable. This also means that you'll no longer need to complete forms R85 or R105 to receive gross interest. Please be aware that you may still be liable to UK tax if you are a UK resident, and we are unable to provide advice relating to tax. We recommend you speak to your accountant.
